

Automate the reception of funds for your crowdfund!

Give your users more payment alternatives to fund projects.

With STP, your clients can invest via **SPEI®** and **CoDi®** electronic transfer using QR codes and CoDi® collection messages directly to your clients' banking apps.

By integrating these solutions, investments in your crowdfund are reflected immediately on your platform, without manual processes, 24/7 and with no amount limit.

Before distributing profits to your investors, you can validate your investors' accounts through the **Electronic Payment Receipt (CEP)**, you can obtain the name or business name and the RFC/CURP

Make sure the resources come from an account associated with your users and mitigate fraud! Do your investors want to withdraw their money? Automate payouts directly from your system to any bank account.

Reduce your manual processes!
